**Subject:** FW: HBEP Existing Workforce Question

Felicia

Per staff's request please see the information provided by AES below regarding the workforce at the Huntington Beach Generating Station.

Thanks

Robert

As confirmed by the AES Plant Manager. The current workforce (total) will equal the proposed HBEP workforce (total). Exiting HBGS did lose a few employees upon the shutdown of Units 3&4. The start up and operations of the synchronous condensers will not require additional new staff. Here are the specifics:

**Existing HBGS Plant Operation Workforce**

Classification	Current
Plant Manager	1
Operations Leader	1
Maintenance Leader	2
Environmental Engineer	1
Maintenance Planner	1
Power Plant Operators	16
Controls Specialty	5
Mechanic	4
Admin	2
<b>Total</b>	<b>33</b>
